FOREVER WOOD

 **ABODO**

Project: Cascading Volumes – Gibsons Landing, Canada

ABOUT US

texel: Canada's Green Leader in Decking and Siding

Discover the future of sustainable construction with texel.

We bring **groundbreaking innovations** like **charred siding**, **thermally treated timber**, and **naturally modified wood**—all without the use of chemicals.

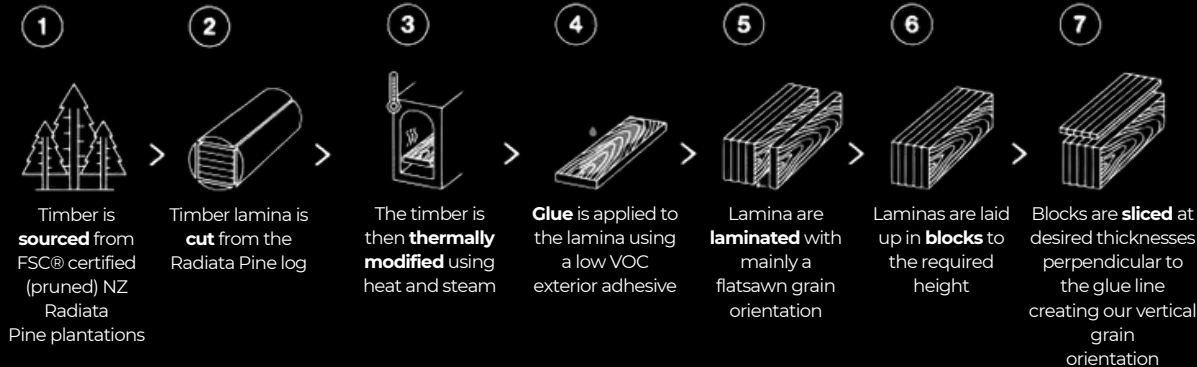

Our exclusive line of ABODO products showcases the latest in **innovative, eco-conscious building materials**.

Grown in one of the world's most sustainable forests in New Zealand, ABODO is **milled and coated in Canada**.

Why Is Our Wood The Smartest Option?

ALL OUR WOOD IS
REAL WOOD

Prioritizing eco-friendly living with modern stylish designs.

- Naturally durable & Stable, we simply use heat and steam
- Sourced responsibly
- Red List Free

Climate Credentials

Our wood is a carbon-negative material.

Vulcan Cladding

Crafted from thermally modified timber, our cladding provides superior beauty, durability, and weather resistance. It's ideal for **residential and commercial exterior siding**.

15-year **Built to Last** warranty

Vulcan Cladding

Natural Durability

Thermally modified = no wood preservatives, we simply use heat and steam.

Stability

Features vertical grain orientation which results in longer set lengths.

Versatile Application

Suitable for both vertical and horizontal installations.

Superior UV Protection

Engineered to protect wood surfaces while maintaining vibrant colors and durability.

↑ AVAILABLE IN
FULL CHARRED FINISH

WB10S 135x20.5

Vulcan Charred Cladding, inspired by Japanese Sho Sugi Ban. Treated with Char Oil for durability, eroding slowly, revealing unique timber variations.

15-year **Built to Last warranty**

Traditional Technique

Uses ancient Japanese charring for wood preservation.

Eco-Friendly

Thermally treated with heat and steam, no chemicals.

Certified Quality

FSC and Declare certified, ensuring responsible forest management and chemical-free safety with transparency.

Vulcan Panelling

Adds the warmth of wood to **ceilings or feature eaves**, creating a beautiful contrast with other design features. It's ideal for enhancing architectural elements and adding a touch of natural charm.

15-year **Built to Last warranty**

TG9 135x10

Natural Durability

Thermally modified = no wood preservatives, we simply use heat and steam.

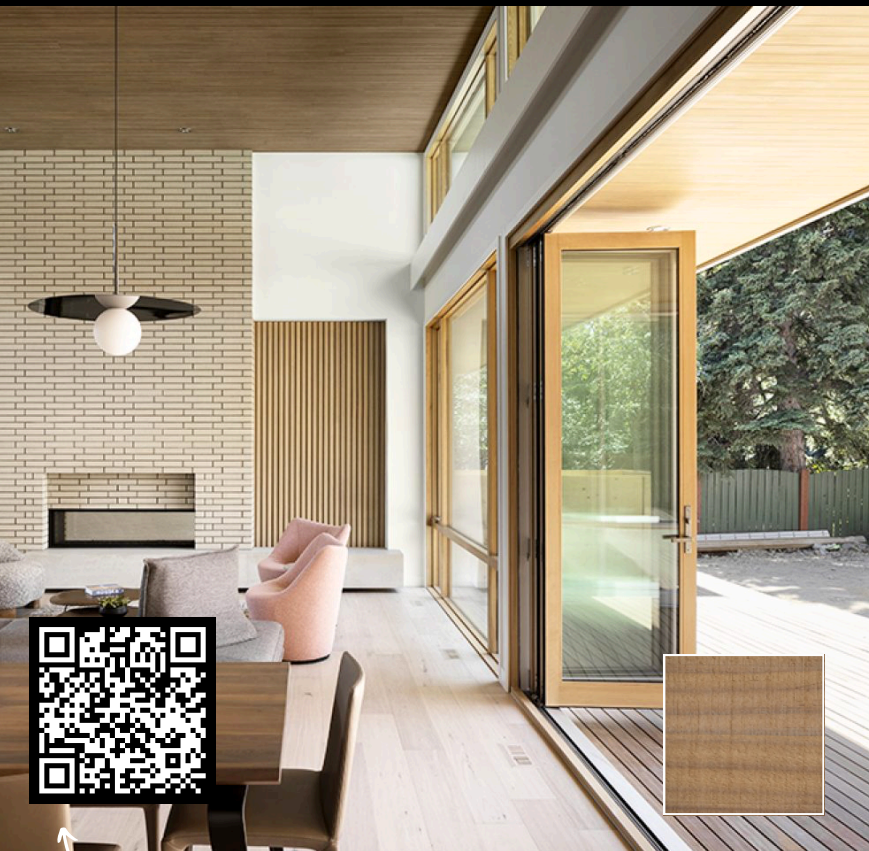

Stability

Vertical grain orientation allows for a thinner profile without compromising performance.

Versatile

Used in indoor and outdoor applications. Lightweight and easy to install.
