

# VULCAN CLADDING

## OVERVIEW

Vulcan timber by Abodo is a renewable **alternative** to Western Red Cedar, storing more carbon than it **takes to produce**. Its **chemical-free thermal modification** creates **stable, low-moisture wood** that resists warping, cupping, and bleeding—making it ideal for dark coatings, even in hot climates. Available in profiles like vertical shiplap and bevel back with multiple finishes, Vulcan suits both exterior and interior applications. A patented **vertical grain** design further **reduces cracking** and ensures long-term weathering stability.

Abodo stains protect wood while allowing the natural weathering process to slowly soften and evolve its color over time.

## STAINS

**NERO**

**GRAPHITE**

**WALNUT**

**TEAK**

**NATURAL**

**WHEAT**

**PATINA**

**SIOO:X**

**SUSTAINABLY STRONG.  
UNMISTAKABLY  
BEAUTIFUL.**

### Thermally Modified Timber

Forest Stewardship Council® (FSC®) Certified

- **Naturally durable**, and contains no wood preservatives.
- Declare certified **Red List Free**
- **15-year Built to Last warranty**

EACH SQUARE METRE STORES  
7.56+  
KG OF CARBON  
Vulcan Cladding

### APPLICATIONS

### VERSATILE APPLICATION

Suitable for both vertical and horizontal installations.

### NATURAL DURABILITY

Thermally modified = no wood preservatives, we simply use heat and steam.

**SUSTAINABLY STRONG. UNMISTAKABLY BEAUTIFUL.**

**15-YEAR BUILT TO LAST WARRANTY**

## FINISHES

### WIRE BRUSHED

Wire brushed wood has its softer grain brushed away to reveal the harder grain, enhancing the natural patterns with a subtle, weathered texture that feels refined and timeless.

### BANDSAWN

Wood with a bandsaw finish shows linear saw marks across the surface, giving it a raw, rustic, and industrial texture that feels authentic and handmade.
