

VULCAN DECKING

OVERVIEW

Sourced from renewable New Zealand plantations, Abodo Vulcan Decking is a sustainable, natural option.

Thermally modified and OPX-treated for durability, water resistance, and termite protection, it features a reeded face for grip and weathering. Stable in all climates, its rich brown tone weathers to silver. Easy to cut, fix, and install without pre-drilling, it's a favourite for both pros and DIYers.

Forest Stewardship
Council® (FSC®)
Certified

Thermally Modified Timber

COMFORTABLE AND
RELIABLE, EVEN UNDER
FULL SUN EXPOSURE.

- Stability:** Thermally modified for reliable performance in harsh Canadian climates.
