# VULCAN SCREENING

DEFINE YOUR SPACE WITH  
NATURAL ELEGANCE.

## OVERVIEW

Vulcan Screening is a **durable, FSC®-certified** alternative to cedar, ideal for rainscreens, battens, louvres, and beams. Its patented **vertical grain** and **thermal modification** ensure **stability in extreme conditions**, while multiple profiles and finishes offer stylish, modern lines that weather beautifully.

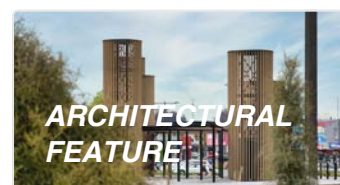

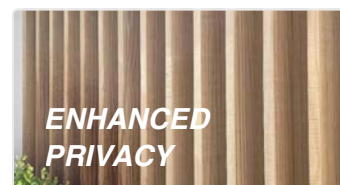

Forest Stewardship  
Council® (FSC®)  
Certified

**Thermally  
Modified  
Timber**

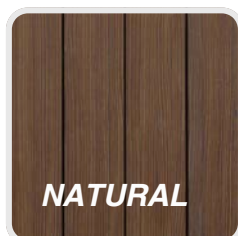

- **Natural Durability:** Thermally modified with heat and steam —no preservatives.
- **Stability:** Vertical grain for longer set lengths.
- **Versatile:** Large-block milling makes ABODO screening highly adaptable.

## APPLICATIONS

## STAINS

Abodo stains protect wood while allowing the natural weathering process to slowly soften and evolve its color over time.

## PERFORMANCE

Thermally modified with heat and steam for natural durability, and vertical grain orientation ensures long-lasting stability.

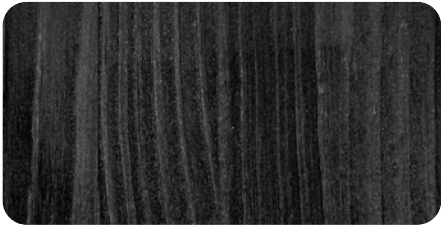

## VERSATILITY

Milled from large blocks, ABODO screening is lightweight, flexible, and suitable for a wide range of applications.

SUSTAINABLY STRONG. UNMISTAKABLY BEAUTIFUL.

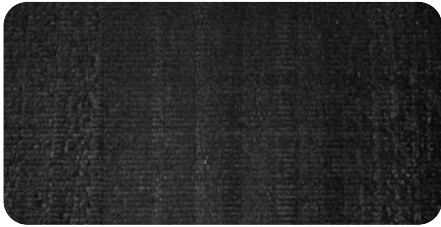

15-YEAR BUILT TO LAST WARRANTY

FINISHES

WIRE BRUSHED

Wire brushed wood has its softer grain brushed away to reveal the harder grain, enhancing the natural patterns with a subtle, weathered texture that feels refined and timeless.

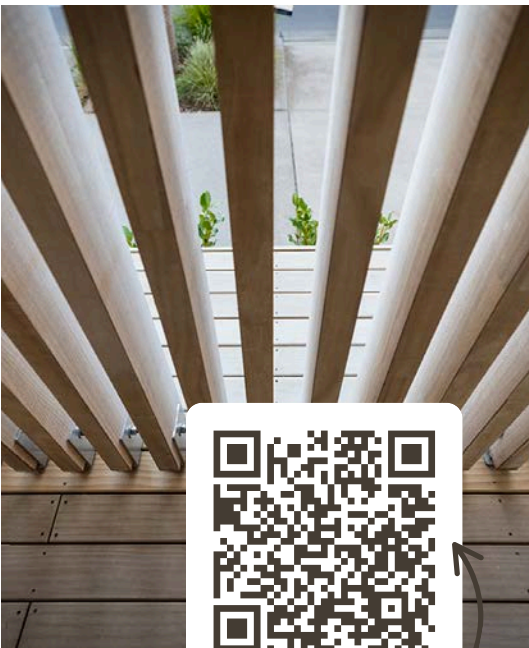

BANDSAWN

Wood with a bandsaw finish shows linear saw marks across the surface, giving it a raw, rustic, and industrial texture that feels authentic and handmade.
